## Summary

Hi ,

I love creating websites and user interfaces.

## Experience

### Frontend Web Developer

Freelance

Nov 2020 - Present (1 year 9 months +)

I have worked as a freelance developer for more than one year developing websites for various businesses.

My biggest project was a taxi booking website for a client located in the US. I was involved in all project phases, from designing the website, building the frontend and backend to deploying it to the customer's domain. I used React for the frontend and an Express.js web API for the backend. The backend had to store the bookings, process payments, and send emails. All the bookings were stored in a Mongo database in the cloud and emails were sent using Sendinblue.

Technical skills and tools: React, Emotion.js, Bootstrap, Figma, Mongo, Node.js, Stripe, Axios, Express.js, Postman.

Other projects helped me improve my knowledge and technical skills in the following areas: databases (relational, document), REST API, and functional programming.

## Education

### Universitatea din Pitești

Bachelor's degree, Computer Science

2022 - 2025

## Skills

Chakra UI • HTML • MongoDB • Express.js • Node.js • Tailwind CSS • Bootstrap • TypeScript • npm • Git
